LOCOMOTIVES

6000 H.P. DIESEL LOCOMOTIVE . . . DESIGNED AND BUILT BY ELECTRO-MOTIVE DIVISION OF GENERAL MOTORS

## *Diesel Power on* **THE LEHIGH VALLEY**

NEW 6000 horsepower Diesel locomotives speed all Lehigh Valley Railroad symbol freight trains over its strategic route between the Great Lakes and the Atlantic.

Part of a program for even better service to shippers who know the advantages of designating "Lehigh Valley," these locomotives are General Motors F3 Diesels, the most versatile power unit on rails, proved by operation on the toughest schedules calling for more than 150 billion gross-ton-miles per year over American railroads.

Meeting today's standards of speedy, careful and dependable handling of freight, Lehigh Valley's service is backed by a record of progress covering more than a century.
